

Do you find it difficult to use a mouse or a touch screen?

Control home appliances by using your voice.

DialoQ® Switch

DialoQ® Mobile

Accessibility applications for controlling your computer, mobile phone and home appliances.

- DialoQ accessibility applications are designed for people with physical disabilities, such as limited use of hands. The applications provide easy access to mobile phone, computer and home appliances using wired or wireless switches or a voice controlled switch.
- DialoQ applications provide independency, safety and efficiency for everyday life.
- Apply for a free 30-day evaluation license: dialoq@code-q.fi.

*"Now I'm
able to use phone
and computer
independently"*

*"I can keep in
touch with my
friends and
family without
assistance"*

DialoQ[®] Switch

DialoQ Switch is a versatile accessibility application for Windows devices. It allows opening and controlling applications, mouse and keyboard use, environmental control and communication – by using wired or wireless switches or a voice controlled switch.

DialoQ Switch supports Eldat, Tellstick, BJ Control Live and IRTrans environmental control systems.

DialoQ[®] Mobile

DialoQ Mobile is a speech and switch controlled accessibility software for Android devices. Users are able to control the phone features and home appliances without touching or seeing the device as all functions are verified by voice prompts, making it ideal also for the visually impaired.

DialoQ Mobile supports HouseMate and Tellstick environmental control systems.
