

DialoQ[®] Speech **N**

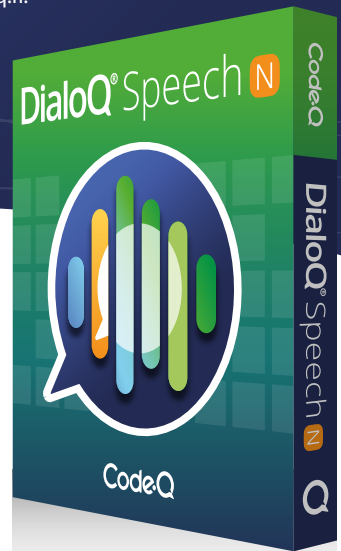

Next-Gen AI-Powered Text-to-Speech

- DialoQ Speech, developed by Code-Q Oy, is a powerful text to speech solution for Windows and Android, specifically designed for communication.
- Our AI-powered speech synthesis delivers natural speech without needing an internet connection, working seamlessly on compatible hardware.
- Missing a speech synthesis voice for your language? Contact us to create the perfect voice together for children or adults: dialoq@code-q.fi.

Supported Languages:

- **English (UK & US), Finnish, Finnish-Swedish, Estonian, Croatian, Bosnian, Ukrainian, German, and Dutch** – most featuring multiple natural voices for both adults and children, with more languages and voices currently in development.

Platform Supports:

Fully compatible with Windows SAPI (32 and 64-bit) and the standard Android Text-to-Speech (TTS) Framework, ensuring seamless integration with your favorite AAC apps.

System Requirements:

To ensure optimal performance, we recommend a Windows i5 processor or better, or an Android Samsung Galaxy Tab A9 or faster device.
